Aqua Astra Technologies

An Aquaculture Technology by Aqua Astra Enterprises LLP

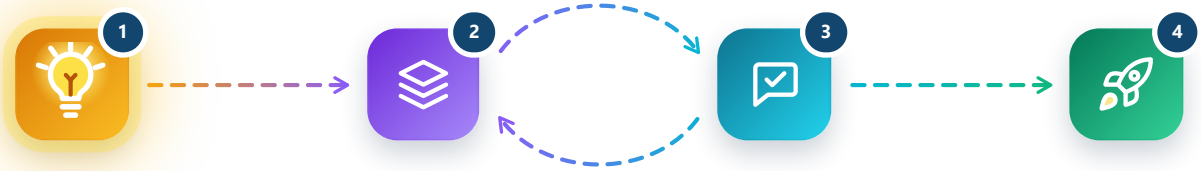

Building Intelligent Software for the Aqua Industry

The team that built Aqua Astra Mobile App can build software for your aquaculture business:

Hatcheries · Farms · Labs · Processors

Everything Possible

LISTEN
Idea
We listen to the problem on your farm or in your business and shape it into something buildable.

BUILD FAST
Prototype
A working first version, quickly, so you can see and touch the idea instead of imagining it.

REFINE TOGETHER
Review
You use it, we listen, and we refine it together until it fits the way your team works.

LAUNCH & GROW
Achieve
A finished product that delivers the result you set out for, and that we keep improving.

What we can build with you

- Dashboards and analytics on your own data
- Farm and pond management
- Lab and water-quality reporting tools
- Mobile apps for farmers and field teams
- and more...

Have an idea for your aqua business? Let's build it together.

THE AQUA ASTRA MOBILE APP

Your pond's lab report, Finally Readable

Water analysis arrives as a page of numbers. The Aqua Astra Mobile App reads that report for you, checks every parameter against scientific thresholds, and gives each pond a clear health score with analysis in plain language.

Google Play

Download the App

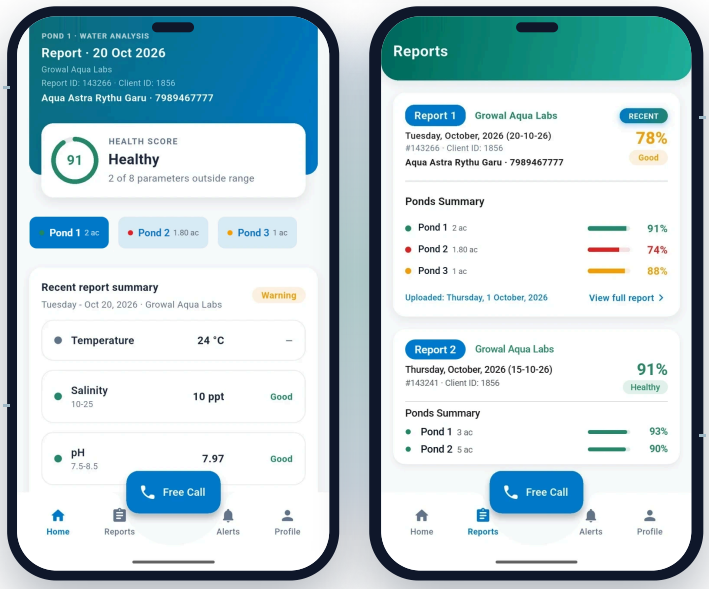

Scan to install

1 Health score at a glance

One number and a colour say whether a pond needs attention today.

2 Every pond, one tap

Switch between ponds — T1, T2, T3 — and see each one's latest report.

3 Readings vs safe ranges

Temperature, salinity, pH and more, each marked Good, Warning or Critical.

4 Free Call, built in

Talk to the Aqua Astra team straight from the app.

What's inside the app

Six tools, one simple screen

Lab Report Analysis
A parameter-by-parameter reading of your report in seconds.

Pond Health Score
A single score with a clear colour band for each pond.

English & తెలుగు
The whole app speaks both languages — switch any time.

Actionable Advice
Specific steps tied to the parameters that triggered them.

Report History
Every analysis saved, so you can follow a pond's trend.

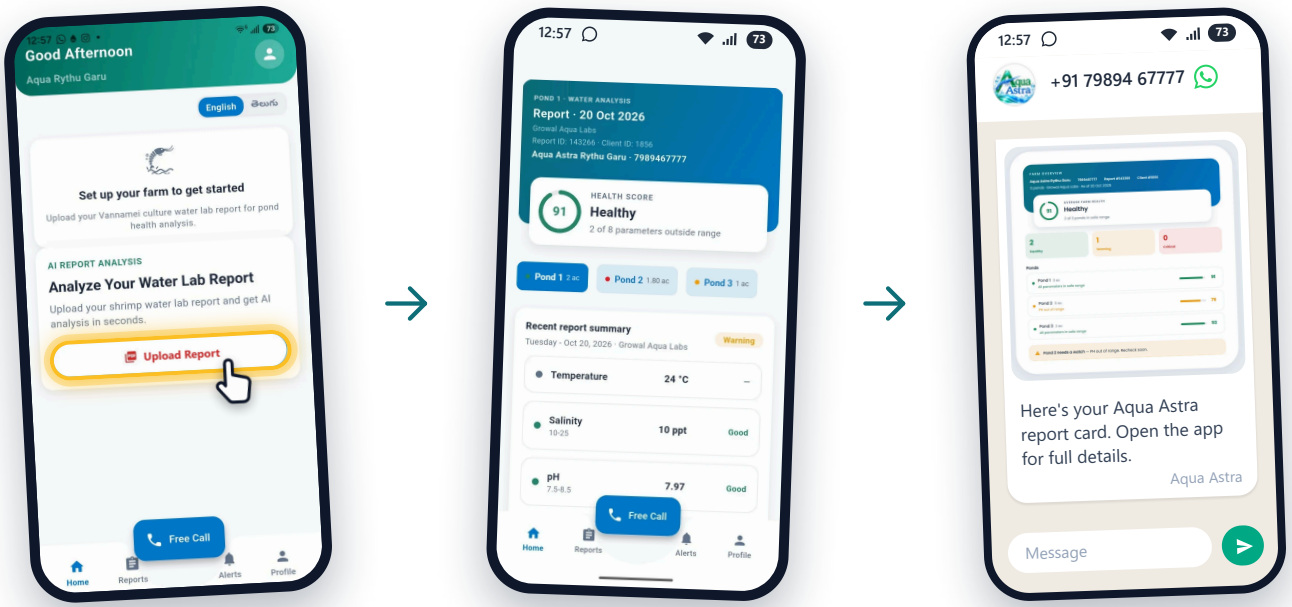

Weather Context
Local conditions alongside your readings.

Made for Vannamei Shrimp Farmers · Consultants · Laboratories · Managers & Researchers

HOW IT WORKS

Share the Report. We do the Reading.

Send your lab report to Aqua Astra once. The results are ready in the app, and the same report card reaches your WhatsApp.

1 Share your report

Tap **Upload Report** and share the lab report PDF or a photo of it.

2 See it in the app

A health score for every pond, checked against safe ranges, with plain advice.

3 Get it on WhatsApp

The same report card arrives in your chat from **+91 79894 67777**.

What happens to your report

Six steps, in seconds

01 Upload the report
Share a lab report or attach a PDF — no re-typing.

02 Content Extraction
Parameters and values are read straight off the page.

03 Scientific rule engine
Every value is checked against documented thresholds.

04 AI explanation
What is off and why it matters, in English or తెలుగు.

05 Health score
One number and a colour for each pond, at a glance.

06 Analysis & history
Next actions, and the report saved to the pond's trend.

- No typing — values are read for you
- Works alongside your consultant
- Switch language at any time

Start with your next lab report

Call or WhatsApp the Aqua Astra team — we'll get you set up.
